# SIMPLIFY PRINT SECURITY WITH CENTRALIZED MANAGEMENT

PROTECT YOUR ORGANIZATION WITH A CENTRALIZED, POLICY-BASED PRINT SECURITY SOLUTION DESIGNED TO SAFEGUARD YOUR ENTIRE PRINT AND IMAGING ENVIRONMENT.

With QRX's secure print management platform, you can automate security settings across your print fleet, reduce administrative effort, and ensure compliance—all while protecting sensitive data and maintaining business continuity.

While many businesses secure their networks and endpoints, printers often remain a security blind spot. This leaves organizations vulnerable to risks such as:

- Confidential documents left at print stations
- Unencrypted data sent to or from devices
- Sensitive information stored on printer hard drives

Over **60%+** of organizations report at least one print-related security incident each year. QRX helps close this gap with managed print services, secure printing solutions, and policy-driven print fleet protection tailored for hybrid and remote workplaces.

Create/review policy — Add devices — Assess devices — Remediate devices — Renew certificates — Review results

Eliminate manual device-by-device setup with automated, centralized print security management. Apply consistent security policies, automate compliance checks, and manage certificates effortlessly. New devices are secured instantly upon joining your network, reducing IT workload and strengthening protection.

KEY CAPABILITIES

Fleet-Wide Policy Enforcement: Set and enforce standardized print security policies across all devices. Policies update automatically as new devices join your network.

Smart Device Discovery & Instant Protection: Automatically discover and secure devices with your security policies the moment they connect.

Automated Compliance Monitoring: Schedule ongoing scans to detect and fix non-compliant settings. Generate detailed reports to support audits and compliance requirements.

Seamless Certificate Management: Automatically deploy, monitor, and renew certificates to ensure encrypted, secure print communications with ease.
