

INTRODUCING Q²: QRX + QUANTUM SQUARING UP FOR A GREENER TOMORROW

QRX Technology Group is proud to announce a strategic partnership with Quantum Lifecycle Partners, Canada's leading IT Asset Disposition (ITAD) and Electronics Recycling provider. This partnership marks a powerful step forward in QRX's mission to deliver secure, sustainable, and full-lifecycle technology solutions to clients across North America.

At QRX, we understand that innovation must go hand in hand with responsibility. Our collaboration with Quantum ensures that our clients' retired IT assets are managed with the highest standards of data security, environmental stewardship, and regulatory compliance. Together, we now offer a comprehensive end-to-end lifecycle process—from deployment and optimization to eco-friendly decommissioning and certified recycling.

"This partnership with Quantum reinforces our commitment to building smarter, more sustainable IT strategies for our clients," said David Vyse, Vice President at QRX Technology Group. *"Together, we're enabling organizations to manage their technology responsibly—without compromising security, performance, or environmental impact."*

Why This Partnership Matters:

- **Environmental Leadership:** Certified electronics recycling and responsible disposal practices aligned with ISO, R2, and NAID standards.
- **Data Security Assurance:** Complete data destruction services, including on-site shredding, secure transport, and serialized reporting.
- **Sustainable IT Lifecycle:** Integrated with QRX's Managed Print and PC Services to offer clients a seamless cradle-to-grave asset strategy.
- **Circular Economy in Action:** Extending the life of electronics through reuse, resale, and resource recovery.

CLOSING THE LOOP

This partnership marks a pivotal step forward in QRX's commitment to environmental responsibility and secure IT asset management. By teaming up with Quantum Lifecycle, a Canadian industry leader in e-waste recycling and ITAD (IT Asset Disposition), QRX can now offer clients end-to-end lifecycle solutions—from procurement to final decommissioning—that meet the highest standards of data security and sustainability. Together, we're helping businesses reduce their environmental impact while unlocking the full value of their IT investments.
