

QRX TECHNOLOGY GROUP PARTNERS WITH DILIGEN TO DELIVER AI-POWERED LEGAL DOCUMENT REVIEW ACROSS CANADA

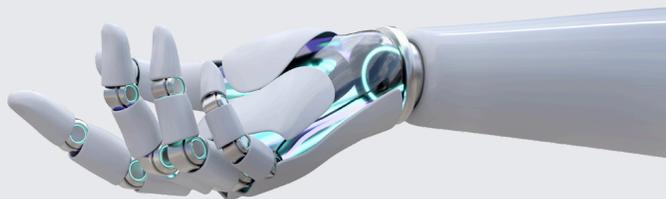

DILIGEN

QRX Technology Group, a leading national provider of managed print and document workflow solutions, is excited to announce a strategic partnership with Diligen, a cutting-edge AI-powered contract review platform. This collaboration brings the benefits of machine learning and artificial intelligence directly into the hands of Canadian businesses—particularly within the legal sector.

With this partnership, QRX continues its mission to help organizations accelerate digital transformation, streamline document management, and reduce manual workload. Using Diligen, QRX customers—including over half of the law firms in Canada—can now automate the tedious and time-consuming process of contract review, while maintaining high standards of quality and compliance.

“The AI system available through our partnership with Diligen will meet key customer needs today and in the future,” said David Vyse, Director of Document Workflow Solutions at QRX. “Law firms and enterprise legal teams can now integrate AI-based contract analysis directly into their existing infrastructure. It enables them to quickly identify and extract key data from hundreds or thousands of contracts—boosting productivity, compliance, and client service.”

“Diligen uses natural language processing (NLP) and machine learning algorithms to identify important legal clauses, generate intelligent summaries, and reduce review time by up to 50%. This gives legal teams—large and small—the ability to deliver more value in less time, manage fixed-fee projects more efficiently, and focus on high-impact work.

CORE CAPABILITIES

QRX Technology Group has been a trusted national provider of print management, document automation, and IT infrastructure solutions. Serving top corporations, institutions, and government clients, QRX offers a complete selection of OEM and remanufactured toner, media, and paper, as well as imaging equipment sales, service, and all-inclusive Managed Print Services (MPS).

Headquartered in Toronto, QRX operates coast to coast with regional offices across Canada.

This collaboration enhances QRX’s portfolio of document workflow automation, contract lifecycle management tools, and legal technology solutions.
